## TURF EVALUATION KIT

The **Turf Evaluation Kit** includes a **Macroscope** and **Prism Gauge** packaged together in a hardwearing and waterproof protective case, allowing you to safely and conveniently store and transport them.

### **Macroscope**

The Macroscope allows you to take a closer look – inspect the quality of cut for yourself and see what your mowers are doing to the turf.

- Lightweight and easy to use
- Get a detailed look at turf health
- Identify diseases, nutrient issues and other physiological conditions
- Observe what is really going on with turf at 25X actual size

### **Prism Gauge**

The Prism Gauge helps you to put some science into your cutting practices and monitor your height of cut.

- Determine actual height of cut
- Guarantee consistency in cutting units
- Robust, quality design
- Easy to read scale
