 Shop Par Aide accessories designed to improve pace of play. Research shows slow play is one of golf's biggest issues and one Par Aide is perfectly positioned to help you efficiently address. The right signage, hazard markings and tee box identifiers quickly communicate to golfers and help speed up round after round.

FUSIONCAST® SIGNS

We use a cold casting process that results in highly custom, durable and lightweight signage solutions. The process is eco-friendly and best of all, more economical than other cast metal methods. Our cast bronze and aluminum signs, plaques and related signage products provide an endless array of possibilities for any application.

See pages 51-57 for more details.

EDGE-SAVER™

Our new Edge-Saver addresses the new USGA rule allowing flagsticks to be left in the cup while putting. It can be attached to any Par Aide flagstick and effortlessly lifts the ball out of the cup without damaging the turf.

See page 32 for more details.

**HOLE DAMAGE SIGN**

Place our Hole Damage Sign on the first and tenth tees to bring attention to your cup edges for golfers electing to putt with the flagstick in the cup. Signs are made of durable laminate and are available in green or brown.

See page 32 for more details.

**PAR 3 DISTANCE SIGN**

Give golfers the exact distance to the hole from each tee with this gorgeous wood sign. Place it at the cart path, near the bottom of a hill or right next to your tee markers. Whichever you choose, you will be reducing golfers pace of play by assisting in their club selection prior to approaching the tee.

See page 64 for more details.

PRISM FLAGSTICKS

Presenting two ways to make laser distance measuring devices easier to use and more accurate on your golf course. Our Prism Flagsticks integrate the reflecting prisms into the body of the flagstick while our PinSite® Reflector screws onto the flagstick in place of the acorn nut.

- For use with all laser golf distance measuring devices including Bushnell®, Laser Link®, Leupold®, Nikon®, Callaway® and others.
- Premium glass prisms for maximum accuracy.
- Prism Flagsticks (available in ½ in. and ¾ in. tapered) are machine drilled, allowing precise insertion of prisms.
- PinSite Reflector is constructed of nylon so threads won't seize to the top of the flagstick.

PINSITE REFLECTOR

With our patented Pinsite Reflector, convert any existing flagstick to give precise readings to laser distance measuring devices. Screws in place of acorn nut. Nylon thread prevents seizing to the top of the flagstick.

Key Feature

The 360° Hole Painter™ is the easiest and most effective way to paint the top 1 in. above the cup bright white. See page 72 for full details.

EDGE-SAVER™

As a result of the new USGA rule allowing the flagstick to be left in while putting, cup holes are being increasingly damaged by golfers. This is caused by golfers reaching into the cup to retrieve their golf ball with the flagstick still in place, or by forcing the ball out of the cup with the flagstick. Our new Edge-Saver is an easy to use device that removes golf balls from the cup without damaging the hole. It attaches to any Par Aide flagstick and nests perfectly into the grooves of our ferrule. The Edge-Saver is designed to freely move up and down the flagstick, further minimizing any damage when removing or replacing in the cup.

EDGE-SAVER

HOLE DAMAGE SIGN

With more golfers putting with the flagstick in the cup, the risk of cup edges becoming damaged from removing their golf ball is elevated. By placing our 7 in. x 14 in. (18 cm x 35 cm) Hole Damage Sign on the first and tenth tees you can bring attention to your cup edges for golfers electing to putt with the flagstick in the cup. Signs are made of durable laminate and are available in green or brown.

COURSE MARKINGS

Helping golfers navigate their way around your course, practice areas and facilities improves the overall experience, playability and can improve overall pace of play. From our new line of premium FusionCast® products to our full range of course markings, Par Aide has the right options to help set your course apart.

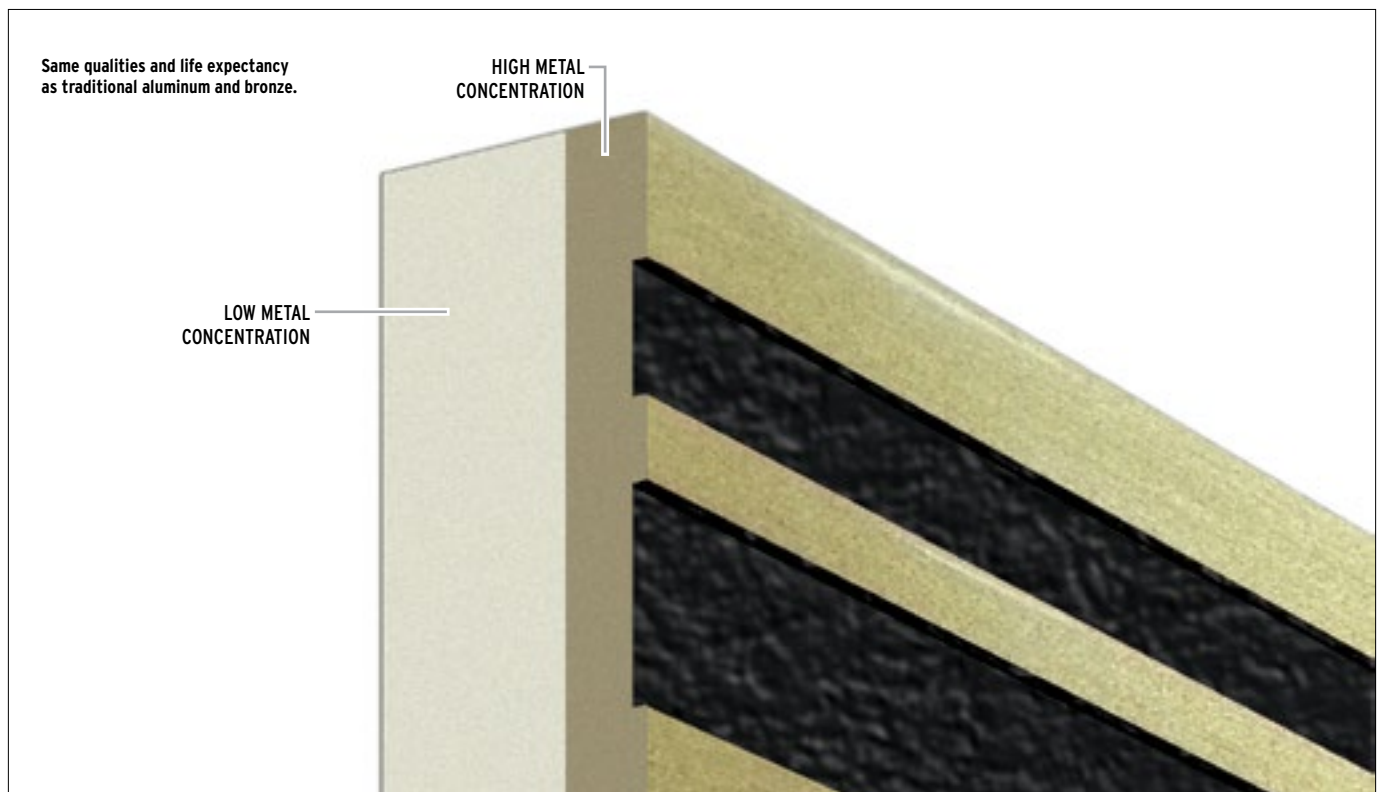

The ultimate sign of quality.

Nothing helps elevate the perception of course status more than cast metal course signage. But the prohibitive cost of foundry-produced cast signage can be out-of-bounds for most. Now with Par Aide's line of FusionCast signage, aluminum or bronze metal signs, plaques and markers are within reach.

Our FusionCast signage uses a patented technology that fuses metal with high density urethane (HDU), resulting in dimensional plaques and markers that look, feel and perform like foundry-poured signs, but without the excessive weight and high production costs.

This unique cold-casting technology also lets us create highly detailed customized signs. Emblazon your brand onto tee markers and plaques, in-ground tee and fairway yardage plaques, cart path pyramids, sponsor signs, facility wayfinding signs and tee signs. Every FusionCast sign is available in aluminum or bronze and adds an elegance that enhances the brand of your facility.

Par Aide FusionCast markers and signs are available in a range of stock template shapes, sizes and mounting configurations. Best of all, our FusionCast signs are proven to perform exceptionally in the harshest climates, providing the richness and rugged durability you expect from high-quality metal signage.

TEE SIGNS

Our tee signs are the perfect way to enhance the branding of your course on each tee box. These products are completely customizable to the detailed specifications of your course creating endless possibilities including:

- Custom tee yardages.
- Full color domed or sleek cast metal logos.
- Domed hole layouts.

LOGO AND HOLE LAYOUT OPTIONS

Whether it's your course logo or a company logo for your sponsor signs, we have two options that work great for most FusionCast products. The sleek cast metal logo offers a uniform look in the popular aluminum or bronze metal options. If you are looking for a full color logo, our super durable and weather resistant domed acrylic logos give your FusionCast signs a look that pops. Further customize each tee sign with a detailed, full color hole layout with our acrylic domes. Another great feature and gives golfers an aerial view of each hole.

ACCUFORM ACCUSEED™

The Accuform AccuSeed is the perfect spot seeding tool. The specially designed stainless steel spring loaded spikes puncture the turf $\frac{3}{16}$ in. deep while dropping bent grass seed precisely into the holes, allowing for ideal seed to soil contact. Grass seed is easily filled into the black housing and is only released when the spring-loaded head compresses. There is minimal impact to the surface, due to the flat surface of the seed housing, which causes little disruption to play. 43 in. tall (109 cm).
